CANDIDATE

INSTUTIONAL REPRESENTATIVE

PROPOSAL

TITLE: _____

IS THE PROPOSED RESEARCH BASIC (LABORATORY) OR CLINICAL (HUMANS)? _____

CLASSIFY YOUR PROPOSAL USING THE AACR 1994 ABSTRACT CATEGORIES AND SUBCLASSIFICATIONS (E.G. CB1, ET2, ETC. _____)

(SUBCLASSIFICATIONS CAN BE DOWNLOADED AT:

<http://cancerres.aacrjournals.org/cgi/reprint/53/Supplement/8s>)

SUMMARY OF RESEARCH PROPOSAL (600 WORD LIMIT)

IN THE SUMMARY, PLEASE ADDRESS THE FOLLOWING 3 QUESTIONS:

1. To what level does the proposed project challenge existing paradigms and present innovative hypotheses to promote progress in the prevention, control and treatment of the most difficult-to-treat cancers (e.g. pancreatic, lung, liver, sarcomas, esophageal, brain, gastric and ovarian cancers)?
2. What is the potential benefit of the research to issues regarding prevention, control or treatment in the most difficult-to-treat cancers?
3. Describe the conceptual framework and reasoning around the design, methods and analyses proposed and their appropriateness to the aims of the project.
